Specific Risks and Disclaimer

As this Fund may invest in overseas securities it may be exposed to and can hold currencies other than pounds sterling. As a result, exchange rate movements may cause the value of investments to decrease or increase.

The Fund has the ability to invest in companies that may have a volatile share price (e.g. the healthcare and technology sectors). Accordingly, investment in the Fund may be subject to sudden and large falls in value and you might not get back the full amount originally invested.

The Fund may have a concentrated portfolio of assets; lower diversification and active stock selection can result in greater than average investment in individual companies. Such concentration can give rise to more risk than where investments are spread over a large number of companies. Whilst this may increase the potential gains, this concentration of exposure and lack of diversification may also substantially increase the risk of loss to the Fund.
